

Wireless Remote for CineFLEX RGB

Reference: Z-LLA-REMOTERC5

- Remote control for the CineFLEX RGB series
- Built-in digital display
- Used for both RGB functions
- Adjusts the intensity on primary RGB colors
- Adjusts color temperature & brightness
- Effective control distance is up to 50 m
- Battery operated

Product description:

The 2.4G radio remote with digital display is now available for the CineFLEX RGB LED panels.

The remote features intuitive controls using a double function control wheel and basic ON/OFF

and UP/DOWN buttons.

Remotely control both RGB and bi-color functions of the new CineFLEX LED mat. Adjust the intensity on each primary RGB color and render million different colors to fulfill any lighting effect requirement. Adjust the color temperature and brightness on the bi-color function to match the CineFLEX RGB with any lighting ambient.

The effective control distance is up to 50 m, without the presence of any obstructions or environmental electromagnetic interference, using digital data over 2.4GHz frequency.

Capable to control multiple devices individually or all together (if multiple CineFLEX units are set on the same channel).

This radio remote is a handy accessory for CineFLEX RGB LED mats that can be used to make all the needed adjustments, without individually operating each panel.

Dimensions: 179 x 56 x 22 mm

Weight: 160 g

Note: Compatible only with RGB CineFLEX series. Not compatible with Bi-Color models.
