

CineBall T2000 Lantern Light

Reference: LTS-CINEBALLT2K

- Power: 2000W
- Light output: 6200lx @ 1m
- Lamp socket: G38 (CP73 / CP41)
- Diameter: 94 cm (37") | Weight: 3.9 Kg
- Soft tungsten light resembling to a China ball lantern light
- Heat-resistant and washable softbox fabric
- Upper side reflective interior to enhance light output

Product description:

Even and soft light source

The CineBall T2000 is a soft tungsten light with an overall look similar to a China ball fixture used by photographers / videographers and filmmakers to fill an entire shooting scene with even, soft light. The whole effect of the CineBall resembles to a giant light bulb that can be used to set the general lighting level, brighten the ambient, give a nice glow to the subjects and ideal even as a back light for a wrap around, soft effect.

Easy to assembly stainless steel construction

The solid stainless-steel wire construction makes the light more durable and reliable than a conventional paper lantern light. The CineBall comes with a preassembled wired cylinder cage with a "U" shaped center frame that simply latches to the bottom of the cylinder and shapes into a spherical form using pressure on both ends. No effort is needed, easy and fast to assemble by simply pushing down the center frame and hook the bottom.

Industry standard G38 lamp socket

This lantern light uses G38 2000W (110V or 230V) tungsten lamps commonly found on the 2K Fresnel lighting fixtures. The heavy duty three core power cable comes with integrated illuminated ON/OFF power switch to operate the lamp.

Heat-resistant fabric

The CineBall T2000 uses a heat resistant, ball-shaped fabric which can be easily velcro-ed onto the spherical wired frame. The upper half of the fabric is designed as a rigid black tent with silver reflective interior to enhance the light output, while the bottom half consists of an 1/2-stop silk diffusion to even out the output and provide 360 degrees of beautiful soft light. The whole fabric is entirely washable, in case that the white diffusion gets dirty.

Standard baby pin mounting

The CineBall T2000 uses a long neck 16 mm mounting rod and can be easily boomed on a C-stand or Combo stand using a gobo head and arm to attach it. This lantern light can be positioned in different ways, most often hanged above the subjects to act as an ambient scene lighting.

Rigid cylindrical transport case

The CineBall T2000 comes with included rigid case with tubular design, provided with a small handle and a shoulder strap for easy transportation. The collapsible China ball type fixture is lightweight enough to be carried around and mounted into any location to be used for both indoor and outdoor applications.

Key Features:

- soft tungsten light resembling to a China ball lantern light
- easy to assemble stainless steel wired construction
- heat-resistant and entirely washable fabric
- upper side black tent with silver reflective interior to enhance the light output
- bottom side 1/2-stop silk diffusion to even out the output
- stainless steel mounting rod 160 mm length
- includes rigid tubular case with small handle and shoulder strap for easy transportation
- diameter: 95 cm / 37"

Package Content:

- 1 x CineBall T2000 lantern light
- 1 x Collapsible wired cylinder cage
- 1 x G22 lamp socket with central frame
- 1 x softbox
- 1 x 3m power cable with CEE 7/4 Schuko plug
- 1 x Cylindrical transport case

Technical Specifications:

Tungsten - Flood

Beam type	flood
Rated power	2000 watts
Voltage input	100-240V 50 / 60 Hz
Lamp type	CP73 / CP41 2000W
Lamp socket	G38
Color temperature	3200K
Beam angle	180°
Photometrics	1m: 6200 lx 2m: 3000 lx 3m: 1800 lx
Housing color	Black & white
Housing material	Heat resistant Nylon
Power connector type	CEE 7/4 - Schuko
Power cord total length	3.0 m
Lamp head dimensions	94 cm
Lamp head weight	3.9 kg
