

High Current AC Power Adapter for CineTUBE HUE

Reference: LLT-18V20APWRADPK

- Powers & charges up to 4 x CineTUBE HUE 120
- AC universal voltage input 100V-240V
- DC max power output 350 watts @ 18V

Product description:

High current AC to DC power adapter designed for CineTUBE HUE allowing to power & charge simultaneously up to four CineTUBE HUE 120 LED tubes.

This power adapter is helpful when using the CineTUBE HUE lights for an extended period of time (beyond their built-in battery autonomy) and a clean / centralized powering solution is required (reducing the number of power adapters and connecting cables involved in a setup).

le: powering 4 x CineTUBE HUE 120 tubes mounted in a Kino type housing resembling the classic KinoFlo 4FT 4bank functionality - use one high power adapter + one 5m extension cable

1-to-4.

The high current AC adapter is universal voltage compatible (AC 100V-240V / 50-60 Hz) and delivers a max power output of 350 watts at 18V DC.

The package includes a 1.5m long power cable equipped with a PowerCon connector and four DC 5.5*2.1 barrel connectors for powering * charging four CineTUBE HUE 60 / 120 LED tubes.

Package Content:

- High current power adapter for CineTUBE HUE
- AC power cable 1.5m
- DC split power cable with 4 x barrel 5.5*2.1 ends.
