

Telescopic Drop Arm 100-180 cm - HD

Reference: GHX-DROPARM180HD

- Payload: 40 kg
- Maximum length: 180 cm
- M12 screw & thread end
- Fits up to 60 mm diameter pipes
- Stirrup available
- Material: steel
- Aka: telescoping hanger, drop post
- As: KTHS-0306, KGO71312, 429672, C820

Product description:

Heavy duty telescopic hanger (drop arm) with an adjustable clamp with a max opening of 60 mm which allows a fast and secure hanging of a lighting fixture or other studio equipment (fog machine, fan etc) overhead by a truss system, keeping the floor area unobstructed.

On the lower end the drop arm is fitted with an M12 thread & screw which can be used to directly mount a lighting fixture by passing through the yoke bar screw or, when paired with the optional stirrup, to hang the lighting fixture by a C-Clamp.

Additionally, the drop arm comes with a secure wire and secure pin to prevent accidental equipment fall.

The arm is made of quality steel and is chromed plated for lasting durability.

- Adjustable arm length: 100 cm to 185 cm
- Poles diameters: 35 / 30 mm
- C-Clamp opening: 60 mm
- Weight: 4.1 kg

Similar to: KTHS-0306, KG071312, MTH 429672, C820 telescopic hanger with stirrup
