A

Product description:

Junior offset arm used to place a light fixture at a 50 cm distance of a light stand, over an obstruction such as a wall or a door (offsetting a light usually needs a sandbag or a counterweight on the stand to prevent tipping).

Mounts to a stand with a junior 28 mm (1-1/8") receiver and accepts a light fixture with a 28 mm junior pin.

Suitable accessory to hide a stand behind a set wall and to pass the light fixture over the wall.

Heavy duty steel construction supporting a payload of up to 30 kg.

Features a safety pin to secure the mounted light fixture over or under the receiver.

Material: chrome plated steel.

Similar to other brands offset arms: KS-058, F100, 430127, LF.1000.A
