Product description:

This heavy duty wind up stand meets both safety and strength requirements for easily lifting and lowering heavy equipment.

It is a single riser stand with 2 sections that extend from 170 cm up to 280 cm using an oversized slip-free handle with self lock. The central column elevates in small increments of 4.4 cm with each handle turn for fine tune movements.

The universal 28 mm junior top receiver it's suitable for mounting lights or other studio accessories equipped with a 28 mm spigot. This is the ideal stand to be used with the [Super Boom Arm](#) to remotely hang studio equipment.

This stand features a built-in levelling leg to be used on uneven terrain and also comes with braked casters to effortlessly glide across smooth surfaces.

The stainless steel construction with chromed central column and black anodized finish legs makes it suitable for studio setups.
