

Softbox Kit for CineLED GEM 200

Reference: LLA-SBCINELEDS200

- Quick assembly & easy to install
- Includes diffusion layer for soft shadows
- Includes square grid for directional beam
- Includes storage pouch
- For CineLED GEM 200

Product description:

Quick assembly & installation thanks to the "pop-up" design.

By installing only the softbox tent without the front diffusion layer, a light output of 15% gain is possible.

The square grid attaches by Velcro on the softbox and helps reducing the glare & side spill with

the effects of a more directional soft-light source.
