- Maximum Height: 280 cm
- Folded length: 96 cm

Product description:

The CineLight Background Support System is the ideal accessory to be used in a studio environment or in remote locations for simple portraits, larger products photography or special applications such as chromakey / infinity white backgrounds. Both professional and amateur photographers will appreciate a collapsible and lightweight background support that can fit inside tight spaces, converting any household room type into a professional studio.

This system consists of 2 aluminum support stands and a telescopic aluminum cross bar, all fitted inside a transport soft bag. The cross bar can be used along with the optional chromakey green backdrop or with the infinity white backdrop available in 6x3 m size.

The telescopic cross bar features a twist and lock design, with dual mounting spigot receivers at the ends so it can be used as a stand alone drop arm for any lighting fixture when hanged from a ceiling.

Thanks to the system's foldable design and the included transport bag, the backdrop support kit can be easily carried on location even in small cars or stored when no longer needed, occupying a small space.

The various heights and lengths of the Background Support System make it suitable for any desired studio lighting configurations.
