

C-Stand 330 cm with sliding leg

Reference: SSC-CSTAND330M

- Payload: 10 Kg
- Maximum height: 328 cm
- Folded length: 145 cm
- Mounting: spigot 16mm (5/8" stud)
- Sliding upper leg for leveling
- Material: steel

Product description:

The Century Stand or simply known as C-Stand is the most common type of gripping equipment in the filmmaking industry used for mounting lighting fixtures and lighting modifiers or accessories.

These heavy duty light stands are stable and very effective to support more weight than any common light stand. The 2 riser central column with 3 sections allows adjusting the height of the C-Stand.

One great feature of this C-Stand 330 cm is the sliding leg, which allows the stand to adapt to uneven terrain such as

stairs, off curbs or even to high objects such as desks or counter tops. This feature provides optimum support for the lighting fixtures, reflectors or gobo arms.

The unique staggered design of the legs allows for the C-Stand to be positioned very close to other C-stands on the set.

Can be used together with a gobo arm to boom small lights and accessories like scrims, flags, reflectors.

Product features:

Weight: 6.9 kg
Stand type:: C-Stand
Mounting: Stud 16mm (5/8")
Maximum height: 330 cm
Minimum height: 145 cm
Folded length: 145 cm
No of sections: 3
Footprint diameter: 96 cm
Column diameters : 22 / 25 / 35 mm
Legs diameter: 22 mm
Leveling leg: Yes
Maximum payload : 10 kg
Collapsing protection: Spring
Material: Stainless steel
Color: Chrome
Removable base: No
Includes boom arm: No
