- Payload: 10 Kg
- Maximum height: 325 cm
- Folded length: 134 cm
- Mounting: combo 5/8" pin & 1-1/8" receiver
- Material: steel

Product description:

The combo stand with rolling base is designed for mounting lighting fixtures, camera, tethering table or anything with a spigot 16 mm receiver or 28 mm stud. Very useful accessory for studios with smooth surfaces

The combo stand features a dual mounting function: 5/8" (16 mm) stud and 1-1/8" (28 mm) receiver in order to fit any type of lighting fixture or studio accessory with baby or junior mount.

The legs design allows for the stand's base to be folded for easy storage and transportation.

The removable high density plastic wheels with bearings inside and rubber coating increase the mobility of the stand base. Each wheel is provided with individual breaking to lock the combo base stand into position.

The black anodized finish of the stand eliminates any unwanted reflections, making it suitable for studio setups.
