

Autopole 210-380 cm

Reference: SBX-AUTOPOLE380

- Aluminum construction with silver finish
- Non-slip, rubber cushions at the ends
- Mounts between floor & ceiling
- Can be mounted between solid side walls
- Maximum height: 380 cm
- Payload: 25 Kg (vertical mount)

Product description:

The Cinelight Autopole 380 cm is a silver finish, single action adjustable pole that can be quickly mounted between the floor and the ceiling. It provides a stable support system for different grip arms, booms, lights and other accessories.

The Autopole 380 cm it is height adjustable between 210 cm and 380 cm, being secured through its own force between solid walls or floors and ceilings. The pressure that applies to these surfaces it is enough to keep the pole in place and to be used with lights and grips that weight up to 25 Kg in total (only when autopole is mounted between floor and ceiling). The tension mechanism with the locking system is 2 steps adjustable, meaning that the Autopole can apply different pressures when mounted, depending on the surface's strength.

The Autopole 380 cm has non-slip, solid rubber cushions at the ends to protect the walls, floors and ceilings from being damaged, minimizing the pressure marks and avoid slipping. The spring tensioning mechanism on one end provides the necessary pressure so the pole can be locked in place.

Used with lightweight accessories like small lights, backgrounds and reflectors, the Autopole 380 cm can be mounted horizontally, between the walls, changing any household type room into a photo / video studio.

Product features:

Weight: 2.6 kg
Stand type:: Autopole
Maximum height: 380 cm
Minimum height: 210 cm
Folded length: 210 cm
No of sections: 2
Column diameters : 40 / 45 mm
Maximum payload : 25 kg
Collapsing protection: Spring
Material: Aluminum
Color: Black
