

Autopole 240-420 cm

Reference: SBX-AUTOPOLE420

- Aluminum construction with silver finish
- Non-slip, rubber cushions at the ends
- Mounts between floor & ceiling
- Can be mounted between solid side walls
- Maximum height: 420 cm
- Payload: 25 Kg (vertical mount)

Product description:

The Cinelight Autopole 420 cm is a silver finish, single action adjustable pole that can be quickly mounted between the floor and the ceiling. It provides a stable support system for different grip arms, booms, lights and other accessories.

The Autopole 420 cm it is height adjustable between 240 cm and 420 cm, being secured through its own force between solid walls or floors and ceilings. The pressure that applies to

these surfaces it is enough to keep the pole in place and to be used with lights and grips that weight up to 25 Kg in total (only when autopole is mounted between floor and ceiling). The tension mechanism with the locking system is 2 steps adjustable, meaning that the Autopole can apply different pressures when mounted, depending on the surface's strength.

The Autopole 420 cm has non-slip, solid rubber cushions at the ends to protect the walls, floors and ceilings from being damaged, minimizing the pressure marks and avoid slipping. The spring tensioning mechanism on one end provides the necessary pressure so the pole can be locked in place.

Used with lightweight accessories like small lights, backgrounds and reflectors, the Autopole 420 cm can be mounted horizontally, between the walls, changing any household type room into a photo / video studio.

Technical Specifications:

Stands

Stand type:	Autopole
Maximum height	420 cm
Minimum height	240 cm
Maximum payload	25 kg
Folded length	240 cm
No of sections	2
Column diameters	40 / 45 mm
Collapsing protection	Spring
Material	Aluminum
Color	Black
Weight	3.4 kg
