

Butterfly 200 x 150 cm - Diffusion with Optional Layers

Reference: MRX-TRPAN150X200

- UV treated translucent white material
- Detachable & interchangeable layers
- Aluminum collapsible frame
- Configurable with different fabrics
- Size: 200 x 150 cm

Product description:

This 20 x 150 cm butterfly is a large size diffusion panel made from a collapsible aluminum frame for easy setup and operation.

The frame is made from strong lightweight aluminum with special folding sections to allow easy storage with minimum effort.

The diffusion panel is held in place by strong touch fastener edge strips for a secure grip.

The flag features a translucent white layer used to produce a broad light source with a soft effect.

The material is UV treated to withstand long exposure to sun.

Adding the optional layer fabrics enhance the versatility of this collapsible butterfly. The optional fabrics can be easily applied using the Velcro system.

The optional fabric layers are as follows:

- **silver - gold:** used to create specular highlights adding contrast to the image (silver) or to create a warm effect (gold)
- **black - opaque white:** used for blocking the light to avoid spill (black) or to bounce and soften the light with natural looking results (white)
- **chroma green:** used as backdrop for chroma key applications
- **double black:** used as a traditional flag to absorb the light from the both sides; the thickness of the material increases light obstruction
- **honeycomb:** can be used alone on the frame to direct the light through, acting like a large scrim or can be applied over the translucent diffusion layer to reduce the light spill, acting like a large softbox

For mounting the Butterfly 200 x 150 cm on 2 light stands, two Pro-Clamp with Grip Head can be used which allow for the tilting angle of the panel to be adjusted (see "Add mounting accessories" option on the right). These clamps are compatible with various stands central column diameters.

- Size: 200 x 150 cm
- Weight: 2.5 kg
- Packed size: 160 x 10 x 10 cm
