- Mounts on Junior & Combo Stands

Product description:

The large studio grip head for "Junior" and "Combo" light stand has a sturdy die cast aluminum alloy body and features a grip head attached to a junior 28 mm stud and receiver.

The grip head's aluminum friction pad with toothed surface ensures a firmly grip and a precise position.

Different sized V-shaped jaws can support any type of accessories like gobo arms, large scrims, flags, butterflies, cutters etc with 5/8" or 3/8" mounting studs or tubing.

The grip head jaws have the following diameters:

The teeth of the jaws securely grip the accessory that is mounted between the two plates.

The over-sized handle can be easily operated even with protective gloves to firmly tighten the grip head's plates.

On the 28mm (1-1/8") receiver a large lighting fixture with a 28 mm junior pin can be mounted on the same stand.

The Junior Grip Head is designed to be mounted on most of the Junior and Combo Stands.
