## Product description:

Soft transport bag designed for compact LED panels and accessories, suitable for location assignments. The soft, thin profile facilitates storage and shipping.

The bag features an exterior zippered front pocket to fit in the power cable, adapter, batteries and other optional accessories. The removable interior divider offers proper protection during transport.

The bag's walls are made from high density foam covered by a tough Cordura fabric to resist to intensive use. The

bag can be carried by the grab handle or by the shoulder strap that work very well for easy transportation.

Interior dimensions: 38 x 27 x 6 cm
