Product description:

Transport bag designed for the CineLED EVO "L" panel, suitable for location assignments. The soft, thin profile facilitates storage and shipping.

The rigid frame of the bag offers the best protection to the CineLED EVO "L" panel during transport. The classic travel case appearance of the bag is convenient for travelling abroad with these LED lights.

The interior of the bag is designed to accommodate the CineLED EVO "L" panel and the afferent cables and power

adapter.

The bag features an exterior Velcro front pocket to fit in the power cable, adapter and other optional accessories. An exterior zippered back side pocket and the zippered inside lid pocket can be used for storage. The removable interior divider offers proper protection to the LED panel during transport.

The bag's walls are made from high density foam covered by a tough Cordura fabric to resist to intensive use. The bag can be carried by the grab handle or by the shoulder strap that work very well for easy transportation.
