

Articulated Israeli CineArm long

Reference: GEX-CINEARM280

- For holding small camera LEDs & field monitors
- Made from high grade aluminum alloy
- 1/4" screws at both ends
- Removable shoe mount
- Length: 28 cm
- As: KCP-102R

Product description:

The Articulated Israeli CineArm (also called Vision Arm) is made from high grade aluminum alloy.

The 1/4" threads from the both ends of the arm are attached to ball joints that rotate 360°. A small cut in the ball joint receptors allows for the threads to be bent at 90° angle.

The central elbow of the arm can be 360° rotated to be used in various positions.

To mount the Israeli CineArm on a camera, the included hot shoe adapter can be used.

It is designed for holding small, compact LED camera lights and field monitors.

Length: 28 cm

Similar to other brands articulated arms: KCP-102R.
