

Light Dimmer - 2000 watts

Reference: LTA-DIMMER2000W

- Adjusts light output 100% to 0% seamlessly
- Micro-controller ensures flicker-free operation
- Works with incandescent lamps 200W to 2000W
- Random flicker generator with speed control
- 220 - 240V AC compatible
- Rugged aluminum housing
- Illuminated switches

Product description:

This compact dimmer can be plugged in line with any tungsten light up to 2000 watts and will adjust the light output of the lamp from 100% to 0%.

The dimming process is done by a micro-controller to ensure smooth, flicker free and silent operation. The same micro-controller will auto-adjust the output function to ensure full range dimming (100% - 0%) for all lamps wattage ranging from 20 watts up to 2000 watts. The dimmer features a built-in protection fuse.

The housing is made from rugged aluminum for a long term intensive use and is designed to offer protection to the dimming knob and illuminated switches.

The cable length is 1m and is equipped with CEE 7/4 - Schuko heavy duty power plugs which can be easily replaced with different ones.

Compatible with:

- Redhead 800W / Blonde 2000W
- Junior Fresnel 300W / 650W / 1000W / 2000W

Note: This model is not compatible with Fluorescent, HMI / CMD and LED lights.

Using this dimmer with inappropriate lighting fixtures may cause permanent damages to the light components (ballast, circuit board).
