Product description:

The Double Suction Cup system is a compact, high quality, multi-purpose mounting accessory for lighting fixtures, studio accessories, cameras or any other photo-video equipment. This suction cup is designed to securely mount all kind of fixtures to any flat, non-porous surface.

The die-cast metal body construction has a scratch resistant and non reflective black powder coated surface. The thick rubber suction cup has a 11.7 cm diameter to firmly grip to the car's body or windshield or any other smooth non-porous surface. The double suction cup system is equipped with a 3/8" screw for mounting lights, cameras or various accessories.

Note: an optional 16 mm spigot stud with 3/8" thread is required to be fitted on the 3/8" screw to mount lights with 5/8" (spigot 16 mm) receiver.
