

Cinefoil mate black roll - 61 x 720 cm

Reference: MFX-CINEFOIL06X7

- Lightweight, flexible but durable material
- Form holding and heat resistant
- Non-reflective matte black finish
- Can be clipped to barndoors
- Offers weather protection when used outdoors
- Dimensions (W x L): 61 x 720 cm

Product description:

The Cinefoil is a black aluminum material with a matte finish that can be used to control and shape light. This accessory is ideal to reduce light spill or to eliminate unwanted reflections. The Cinefoil can be placed into any position using tape or staples. You can use the Cinefoil to block the background light from a talent or to focus the beam on a particular object.

Key Features:

- lightweight, flexible and durable material
- shape holding and heat resistant
- non-reflective matte black finish
- controls and shapes light, eliminates reflections from shiny surfaces
- can be quickly shaped to form barndoors, snoot, flags or other light modifiers
- very useful to create different patterns and shapes by cutting holes into the material
- can be clipped to barndoors to extend them
- offers weather protection when used outdoors
- roll measures 61 cm wide x 720 cm long
