

Single Channel Charger for Sony L (NP-F) Battery

Reference: PBC-BATICH750

- Traveler charger for Sony L (NP-F) batteries
- Input voltage of 100V-240V
- LED indicator for the charging status
- Integrated electronic circuit
- Dimensions (LxWxH): 8.5 x 4.7 x 3.3 cm
- Weight: approx. 70 g

Product description:

This Travel Charger is a portable charger for Sony L type (NP-Fxxx) series Li-Ion DV batteries with efficient charging time frame.

Features a compact design with wall mount and input voltage of 100V-240V.

The battery charger includes a LED indicator for the charging status: red light for partially charged and green light for fully charged.

The integrated electronic circuit prevents overcharging and extends battery life.

It is a simple to use battery charger and highly recommended for travelling due to the small and lightweight design.

- Dimensions (L x W x H): 8.5 x 4.7 x 3.3 cm
- Weight: approx. 70 g
