- Interior adjustable compartment
- Telescopic pulling handle
- 3 strap pockets on top lid for lightstands
- Interior dimensions: 59 x 34 x 37 cm
- Exterior dimensions: 68 x 42 x 43 cm

## Product description:

Compact Cordura rigid bag specially designed for LED light panels and matching accessories. Dual directional zippers open quickly to fully expose the interior. The customizable padded interior with detachable Velcro dividers can fit up to 3 LED panels and accessories without light stands or 2 LED panels with 2 suitable light stands, depending on the needs. Multiple interior configurations can be achieved using the many various sized dividers to fit the exact dimensions of the LED panels or, by removing the dividers, one single generous compartment can be created.

The new design of the bag, similar to travelling trolley cases, facilitates handling and carrying around. The bag can be carried now using the telescopic handle and bottom wheels (just like any other trolley case), by carrying handles or using the shoulder strap, any way it suits one's needs.

The bag's lid is equipped with zippered net pockets where you can storage lightweight accessories like filters and softbox components.

One great feature of this bag are the reinforced edges with plastic corners and the longitudinal bottom support for a better protection of the bag during handling and storing. This sturdy construction translates to a prolonged use of the bag.

The bag features two exterior side pockets for extra storage where various accessories can be fitted. Also, another particularity of this bag are the strap pockets on the top of the lid where 3 light stands can fit.

The bag is equipped with an exterior plastic pocket where you can fit small ID cards, in order to personalize your lighting kit.

- Interior dimensions: 59 x 34 x 37 cm
- Exterior dimensions: 68 x 42 x 43 cm
- Weight: 7.1 Kg
