- Two side carrying handles
- Telescopic pulling handle
- 3 strap pockets on top lid for lightstands
- Interior dimensions: 74 x 35 x 44 cm
- Exterior dimensions: 78 x 40 x 47 cm

## Product description:

Water-resistant Cordura padded rigid bag is perfect for carrying portable lighting equipment and keeping it organized for the job. Cordura is a texturized yarn, discontinuous in structure like a natural fiber, with the feel of cotton canvas. This material is abrasion resistant, less vulnerable to fraying at the edges.

The new design of the bag, similar to travelling trolley cases, facilitates handling and carrying around. The bag can be carried now using the telescopic handle and bottom wheels (just like any other trolley case), or simply by carrying handles, any way it suits one's needs.

Dual directional zippers open quickly to fully expose the interior. Inside, detachable Velcro dividers separate the main chamber into sections ideal to isolate lights from stands. The bag is supplied with different size interior dividers allowing multiple configurations. You can remove the dividers to create a single, generous storage compartment. There are two convenient exterior side accessory pockets for extra storage. The bag's lid is equipped with zippered net pockets where you can storage your accessories (like spare lamps, filters, honeycombs , et.).

One great feature of this bag are the reinforced edges with plastic corners and the longitudinal bottom support for a better protection of the bag during handling and storing. This sturdy construction translates to a prolonged use of the bag.

The bag is equipped with an exterior plastic pocket where you can fit small ID cards, in order to personalize your lighting kit. Also, another particularity of this bag are the strap pockets on the top of the lid where 3 light stands can fit.

- Interior dimensions: 74 x 35 x 44 cm
- Exterior dimensions: 78 x 40 x 47 cm
- Weight: 9.4 Kg
