

Redhead 800 watts

Reference: LTO-R800W

- Power: 800W
- Light output: 7650 lux spot / 1530lx flood @ 2m
- Size & weight: 24 x 21.5 x 20 cm | 2.3 kg
- Focusable beam from spot 31° to flood 82°
- Metal housing with heat resistant paint
- High quality interior aluminum reflector
- Optional accessories: softbox, dimmer

Product description:

Cinelight Redhead 800W is a compact, lightweight, multi-purpose quartz flood/fill light, ideal for any location lighting applications. Open-Face lights, like the Cinelight Redhead 800W, tend to spill light everywhere due to the fact that the light emanates both from the bulb and the surface of the silver reflector, which makes them good fill lights.

The spherical shaped housing features an adjustable reflector for flood / spot control. The mechanism changes the globe's position relative to the reflector, so the reflector sends out a wide beam when the globe is close to the reflector and a narrower beam when the globe is pulled away from the reflector.

Designed to operate high temperature tungsten-halogen lamps, and are well suited for tight or confined spaces where maximum light output and beam spread are required for fill or flood lighting. Excellent for use in small TV studios or stages in schools and universities.

These lights make good bounce lights (directed into a white bounce surface) or can be handy for lighting the objects on the background set. To be used for lighting actors, a medium to heavy diffusion is needed to take down the intensity.

For use in television news coverage, and television film commercials as well as in motion picture and industrial film.

Key Features:

- metal housing with heat resistant paint
- high quality aluminum reflector
- ceramic lamp holder
- smooth focusing mechanism
- safety net in front of the lamp
- metal 4-leaf barndoors with filter clips and anti-rust paint
- heavy duty power cord

Product features:

Rated power: 800 watts
Beam type: flood
Voltage input: 100-240V 50 / 60 Hz
Color temperature: 3200K
Beam angle: 31°-82°
Power connector type: CEE 7/4 - Schuko
Power cord total length: 7.0 m
Yoke mount: Spigot 16mm receiver
Housing material: Metal
Housing color: Red
Lamp type: DXX
Lamp socket: R7S
Barndoors slot size: 164 mm
Photometrics spot mode: 2m: 1530 lx | 3m: 680 lx | 4m: 390 lx
Photometrics flood mode: 2m: 7650 lx | 3m: 3400 lx | 4m: 1950 lx
Spot-Flood selector type: Mechanical
Lamp head weight: 2.3 kg
Lamp head dimensions: 24 x 21.5 x 20 cm
