

Low Profile Runway Junior Base

Reference: SSX-LPJUNBASE

- Payload: 30 kg
- 28mm (1-1/8") receiver
- 17 cm height
- 74 cm footprint diameter
- quick deploy & fold of the legs
- braked casters & non-marking
- compatible with c-stand columns
- as KS301012, 388201, KG-350, LA.6085.B

Product description:

Introducing the Low Profile Runway Junior Base, featuring a 28mm (1-1/8") receiver meticulously designed to function as a rolling stand base. When paired with a C-Stand central column or any other studio equipment such as larger lights, fog machines, fans, and speakers—each outfitted with a 28mm (1-1/8") stud—this base excels in providing seamless support. Moreover, it can be paired with an optional 28mm to 16mm spigot adapter, enhancing compatibility with 16mm (5/8") receiver lights and studio gear.

The gracefully arched leg design not only ensures a low profile, maintaining a base height of just 17cm, but also includes silicone-braked casters. These casters facilitate smooth movement across surfaces while also offering the ability to secure the stand in place.

The innovation extends to the spring-loaded pin-lock system, permitting swift leg deployment or folding. When folded, the legs align parallelly, streamlining transportation and optimizing storage efficiency.
